

Spy Photos Of The Mercedes-Benz C63 AMG Wagon

{mosgoogle right}I ran across this story last week but unfortunately due to limited time constraints I wasn't able to publish it, so if you've already seen it, I apologize for my tardiness. For everyone who hasn't heard (or seen) the news, spy photographers recently captured new shots of a wagon variant of the Mercedes C63 AMG. As you'll see in the photos, the model retains the same handsome styling found on the rest of the 2008 C-Class lineup, with the added addition of more storage space to allow the obsessive-compulsive among us to stuff even more crap into the back of their vehicle (or, for the Tony Sopranos among us, a few more bodies). Power for the model is rumored to come from a de-tuned version of Mercedes' 6.2-Liter V8 outputting somewhere between 420 and 450 horsepower, while other highlights of the model likely include enhanced AMG styling, brakes, suspension... basically the same feature set found of the rest of the AMG variants.
