

Mercedes-Benz Achieves Highest Ever Rating In AUTO BILD's Workshop Test

{mosgoogle right}Welcome back ladies and gentlemen; I hope you all had a fantastic weekend. Kicking things off this morning comes word that Mercedes-Benz has achieved a record score in the latest round of workshop tests by German publication AUTO BILD. Four verdicts of 'very good' and an average rating of 'good' were the marks bestowed upon Mercedes, the highest rating ever in the publication's history. As for how exactly the tests work, eight Mercedes-Benz workshops are chosen at random, each of which are then graded on their ability to diagnose and remedy seven intentional, straightforward faults during a service inspection. Also scrutinized is the quality of work provided by each outlet. After the latest round of tests, four MB workshops earned the highest possible rating of 'very good,' while only one scored a rating of 'satisfactory.'
