

New Smart Models Set To Debut At The International Motor Show In Geneva

{mosgoogle right} It's only three days until the International Motor Show in Geneva opens its doors to the public, but if you just can't wait to see the new models smart is unveiling this year, you're in luck, cause we got 'em. First up is the custom graphite gray smart forfour you see pictured above. If you remember a few months back, DaimlerChrysler and BRABUS teamed up for the Essen Motor Show to produce a 210 horsepower BRABUS smart concept, a vehicle designed to showcase the true potential of the smart forfour. This concept has become a reality, and what you are witnessing is the production version of the BRABUS smart forfour, dubbed the smart forfour BRABUS SBR. It features, among other things, 210 horsepower and torque of up to 250 Newton metres, enough to propel the smart SBR from 0-60 in 6.4 seconds and reach a maximum speed of 140 mph; dippolished alloy wheels; and a custom interior featuring leather/alcantara trim with orange seams.
