Mercedes-Benz Debuts myCOMAND Internet-Based Infortainment System At Los Angeles Auto Show

{mosgoogle right}Offering a brief glimpse into the future of in-car entertainment, Mercedes-Benz has unveiled what theyre calling "myCOMAND" â€" an Internet-based infotainment system currently featured on their Concept FASCINATION study. As you might expect from an Internet-based infotainment system, the technology harnesses the power of the almighty Web, and serves it up in a way thats most beneficial to you, the driver, based on your specific location and needs. Heres a few examples that demonstrate the functionality myCOMAND will possess:
