

Details Of The Mercedes-Benz Safety Truck

Although not as well known here in the states, DaimlerChrysler's Mercedes-Benz commercial vehicle lineup is among the most diverse and technologically advanced in Europe. Their most recent project, the Mercedes-Benz Safety Truck, is the latest testament to this fact, offering the truck's operator and surrounding drivers the highest level of safety currently found on any commercial big rig. In addition to the numerous safety features already available on production Mercedes trucks, such as Lane Assistant, proximity and stability control, daytime driving lights, optimized exterior mirrors, the hill-holder, Brake Assist and splash guards in the wheel arches, the Mercedes Safety Truck also demonstrates a number of new technological innovations, including the Active Brake Assist system.
