

Details Of Mercedes' New Intelligent Lighting System

{mosgoogle right} As anyone familiar with Mercedes knows, the company prides themselves on their ability to constantly innovate and improve vehicle technology, which in turn provides customers with the absolute highest level of safety and comfort. In keeping with this mantra, Mercedes has unveiled today their latest headlamp technology, titled the "Intelligent Light System," and has outlined what exactly prospective E-Class owners can come to expect in the latest innovation from Mercedes-Benz. To put it simply, the Intelligent Light System is exactly that - it's a lighting system that intelligently adapts to driving situations and weather conditions, which in turn provides owners with a vastly improved level of visibility.
