Geneva Motor Show World Premier: The BRABUS WIDESTAR (Based On The ML63 AMG)

{mosgoogle right}As if the Mercedes ML63 AMG wasn't already impressive enough, BRABUS has announced they've taken the performance SUV and created what they're calling the WIDESTAR - a higher-horsepowered, better handling, and yes, wider version of the AMG-tuned M-Class. While the feature list of the BRABUS WIDESTAR is extensive, here's a quick rundown of its various specs. Outside, the body has been widened by 4 centimeters thanks to the use of fender flares, completely new front and rear fascias, and add-on parts for the doors and rocker panels. To compensate for the added width, BRABUS added custom tailored Monoblock E wheels in size 11Jx23 and also lowered the ML's AIRMATIC suspension some 30mm.
