

Extensive range of 'Accessories for the smart 2007' available: Clever and smart

{mosgoogle right}The smart fortwo is a car's length ahead of its time and lends a new, modern dimension to urban mobility. The smart's clever vehicle concept remains unrivaled in its second generation as well, a fact also reflected by the new 'Accessories for the smart 2007.' The extensive range of features, which are based on intelligent ideas and sophisticated detailed solutions, include everything from practical storage elements to functional foot mats, effective navigation systems, and outstanding sound systems. The new bicycle, ski, and snowboard racks impressively demonstrate how large equipment items can be stored in the smallest possible space – it's truly intelligent cargo management – la smart.
