First Mercedes-Benz GLK Handed Over To Customer In Bremen

{mosgoogle right}Ladies and gentlemen, what you are witnessing is history, as the metallic tenorite gray Mercedes-Benz GLK 320 CDI pictured above is the first of the new SUV range to find a home with an actual, real-life customer. Taking delivery of the model is none other than Magdalena Dietz, age 29 â€“ an entrepreneur and PR consultant who, along with her husband, own the public relations agency "wortsuchttext." To commemorate the GLKs historic launch, plant manager Peter Schabert handed over the keys to the new SUV personally at the Customer Center of Mercedes Bremen plant. During the event, Peter noted "The GLK is our most important new model this year. It is the first compact sport utility vehicle (SUV) from Mercedes-Benz and the first Mercedes-Benz SUV â€˜Made in Bremenâ€™, so I am particularly delighted to personally hand over the first GLK to its owner. I am sure she will be impressed by its unmistakable look, outstanding performance - on and off the road - and its safety and comfort."
