

Exclusive Mercedes-Benz SLR McLaren Roadster To Be Auctioned In Saks Fifth Avenue Holiday Catalog

I don't need to extol the virtues of the Mercedes-Benz SLR McLaren Roadster, as its numbers speak for themselves. A total displacement of 5,439 cc; power output of 617 horsepower at 6,500 rpm; 575 lb-ft of torque at 3,200 - 5,000 rpm; 0-62 mph in 3.8 seconds; a top speed of 206 mph. I think you get the idea. But for some, numbers aren't enough. For some, uniqueness plays an equally decisive role when determining whether or not they should make a purchase, and to this group, I present to you the ultimate in exclusivity – a limited edition Mercedes SLR McLaren Roadster. It is, by all accounts, a truly rare creature. The last of its kind, it is the only SLR McLaren Roadster in existence to feature a Sienna Pearl metallic paint composition. With metallic elements three times the size of traditional metallic paint, the color can be described as a radiant brown metallic finish with deep copper undertones. Complementing the exterior, a Tobacco Brown leather interior has been chosen, while gold brake calipers complete the model's unique design.
