The BRABUS SV12 R Mercedes-Benz S600: The Worlds Fastest Luxury Sedan

{mosgoogle right}Continuing their tradition of developing the most powerful Mercedes models in existence, BRABUS has just unveiled the latest member of their high powered luxury sedan family. Its titled the BRABUS SV12 R, and its based on the recently face lifted Mercedes-Benz S600. So how powerful is it? In total, the BRABUS SV12 R boasts a staggering 750 hp (740 bhp) / 552 kW at 5,500 rpm, while peak torque comes in at 1,350 Nm at 2,100 (electronically limited to 1,100 Nm). All of this is made possible through a displacement increase from 5.5 to 6.3 liters, four new camshafts, larger turbochargers and a more efficient intercooling system (among other things), with the end result being a 0-62 mph time of 4 seconds flat along with an electronically limited top speed of 211 mph. Yes ladies and gentlemen, you heard that right: an electronically limited top speed of 211 mph.
