Brabus Debuts SV12 S Biturbo Roadster

{mosgoogle right}Its been a while since Brabus has debuted any new products for the power- whores among us, but thankfully, that drought is about to end. Thats because the company today has released the specs for their latest monster, the Brabus SV12 S Roadster, a new high-powered variant of the recently- updated 2007 Mercedes SL600. To be honest, high-powered is really an understatement when describing the Brabus SV12 S... super-powered is more like it. An increase in the displacement from 5.5 to 6.3-Liters thanks to a new billet steel crankshaft, larger cylinder bore, special pistons and piston rods; a new turbocharging system with two larger turbochargers and more efficient intercoolers; special mapping for engine electronics and additional on-board diagnostics - these are just some of the ways Brabus managed to squeeze an awe-inspiring 730 hp / 537 kW out of the SL600s innocent V12 powerplant.
